SIOP Forecast Insights & Recommendations

Deep dive into forecast performance and actionable insights

💡 Key Insights

- Forecast Accuracy achieved approximately **58%**, indicating strong forecasting performance.
- Forecast Bias remained around **-42%**, indicating a tendency toward under-forecasting.
- Country **D** exhibited the lowest forecast accuracy(**~3%**) and the highest positive bias, requiring immediate investigation.
- Actual and forecast quantities followed similar trends across periods.
- Country **A** contributed the largest share of total forecast quantity.

🎯 Recommendations

- Review forecasting assumptions for Country **D**.
- Monitor **forecast bias** regularly to reduce deviations.
- Continue tracking Actual vs Forecast trends.
- Use Lag analysis to improve forecast reliability.
- Conduct monthly reviews for **high-variance countries**.
- Collaborate with regional teams to validate demand inputs.
- Implement exception alerts for sudden forecast deviations.
- Focus improvement efforts on countries with **lower accuracy**.
- Update forecasting models using recent demand patterns.

Forecast Performance Summary by Country

Country	Total Actual Qty	Total Forecast Qty	Forecast Accuracy %	Forecast Bias %	Variance %
A	1,26,77,017.95	34,50,593.09	27.2%	-72.8%	0.73
B	2,52,446.00	11,41,756.19	22.1%	77.9%	0.78
C	3,42,109.00	5,22,869.11	65.4%	34.6%	0.35
D	74,164.00	25,88,121.93	2.9%	97.1%	0.97
Total	1,33,45,736.95	77,03,340.32	57.7%	-42.3%	0.42
